The 17 Day Diet is divided into four cycles, each lasting 17 days. The cycles are designed to accelerate weight loss and boost metabolism. Below is a brief overview of each cycle:

### Cycle 1: Activate

The first cycle focuses on rapid weight loss through low-calorie meals consisting primarily of lean proteins, vegetables, and probiotic-rich foods. It eliminates sugar, starchy foods, and processed items to kickstart your metabolism.

### Cycle 2: Activate (Continued)

In the second cycle, you introduce healthy carbohydrates such as whole grains and fruits. This phase aims to sustain weight loss while promoting a balanced diet.

### Cycle 3: Achieve

The third cycle emphasizes maintaining your weight loss through a balanced diet that includes a wider variety of foods. You can continue to enjoy healthy carbs while focusing on portion control.

### Cycle 4: Arrive

The final cycle is about maintaining your weight in the long term. You can incorporate all food groups but should remain mindful of portion sizes and eating habits.
