2. Oil Filter

- Function: Keeps engine oil clean for optimal performance.
- Replacement Frequency: Every oil change, typically every 100 hours.

3. Brake Pads

- Function: Essential for safe stopping; worn pads can reduce braking efficiency.
- Replacement Frequency: Inspect regularly; replace when worn down.

4. Tires

- Function: Provide traction and support for the ATV.
- Replacement Frequency: Inspect for wear; replace as needed.

5. Battery

- Function: Powers the electrical systems and starts the engine.
- Replacement Frequency: Typically every 2-3 years, depending on usage and care.

Maintenance Tips for the 2006 Honda Rancher 350

Regular maintenance is crucial for ensuring the longevity and performance of the 2006 Honda Rancher 350. Here are some essential maintenance tips:

1. Regular Oil Changes

- Change the engine oil every 100 hours of operation or at least once a year.
- Use the manufacturer-recommended oil type to ensure optimal performance.

2. Check the Tire Pressure

- Maintain proper tire pressure for better handling and fuel efficiency.
- Inspect tires for wear and replace them when necessary.

3. Inspect Brake System

- Regularly check brake pads and fluid levels.
- Replace worn pads to ensure safe operation.

4. Clean the Air Filter

- Inspect and clean the air filter regularly to prevent engine damage.
- Replace it if it is excessively dirty or damaged.

5. Battery Maintenance

- Keep the battery clean and free from corrosion.
- Check the connections and ensure they are tight.
