Additional Resources

1. *Access to Health, 15th Edition* by Rebecca J. Donatelle

This comprehensive textbook offers an in-depth exploration of health and wellness, focusing on prevention and access to healthcare resources. It covers a wide range of topics including physical, mental, and social health, emphasizing the importance of informed decision-making. The 15th edition updates current health statistics and integrates new research to provide relevant and practical information for students and health professionals.

2. *Health Behavior: Theory, Research, and Practice* by Karen Glanz, Barbara K. Rimer, and K. Viswanath

This book provides a detailed overview of the theories and research underlying health behavior change. It is essential for understanding how individual, social, and environmental factors influence access to and utilization of health services. The text is designed for students and practitioners interested in applying behavioral science to improve public health outcomes.

3. *Public Health: What It Is and How It Works* by Bernard J. Turnock

Turnock's book offers a clear introduction to the field of public health, including the structures that facilitate access to health care. It discusses health policy, health services organization, and the social determinants that impact health equity. The text is particularly useful for those interested in the broader context of health access and public health systems.

4. *Health Policy and Politics: A Nurse's Guide* by Jeri A. Milstead and Nancy M. Short

Focused on the intersection of health policy and nursing practice, this book highlights how policies affect access to health care services. It explains the political processes that shape health care delivery and the role of advocacy in improving health equity. The guide is valuable for students and professionals seeking to understand and influence health policy.

5. *Social Determinants of Health* by Michael Marmot and Richard Wilkinson

This book explores the social, economic, and environmental factors that affect health and access to healthcare. It emphasizes the importance of addressing these determinants to reduce health disparities and improve population health. The authors provide evidence-based insights into how social policies can promote better health outcomes for all.

6. *Essentials of Health Behavior: Social and Behavioral Theory in Public Health* by Mark Edberg

Edberg's text focuses on the application of social and behavioral theories to public health challenges, including barriers to healthcare access. It offers practical strategies for designing interventions that promote equitable health access and improve community health. This book is ideal for students and practitioners interested in health promotion and education.

7. *Introduction to Health Care Management* by Sharon B. Buchbinder and Nancy H. Shanks

This book introduces the fundamentals of healthcare management, including strategies to improve access to health services. It covers organizational structures, management principles, and the

financial aspects of healthcare delivery. The text is useful for understanding how effective management can enhance service accessibility and quality.

8. *Health Equity in a Globalizing Era: Past Challenges, Future Prospects* edited by Ichiro Kawachi, Bruce P. Kennedy, and Richard G. Wilkinson

This edited volume examines global health inequities and the challenges of ensuring access to healthcare worldwide. It includes case studies and policy analyses that highlight disparities and propose solutions for achieving health equity. The book is an important resource for those studying global health and access issues.

9. *Community/Public Health Nursing Practice: Health for Families and Populations* by Karen S. Geron and Marilyn J. Henneman

This text focuses on community and public health nursing roles in promoting access to healthcare and improving population health. It covers assessment, planning, and intervention strategies tailored to diverse populations. The book highlights the nurse's role in addressing social determinants and facilitating access to essential health services.
