Foundational Concepts

The Constitution

At the core of American government is the Constitution, which serves as the supreme law of the land. Drafted in 1787 and ratified in 1788, it established the framework for the federal government, delineating the powers and responsibilities of each branch.

- Preamble: Outlines the purpose of the Constitution, including promoting justice and securing liberty.
- Articles: Seven articles that define the structure of the government.
- Amendments: The Constitution has 27 amendments, with the Bill of Rights (the first ten) protecting individual liberties.

Branches of Government

The U.S. government operates under a system of checks and balances, dividing power among three branches:

1. Legislative Branch: Composed of the U.S. Congress, which includes the Senate and the House of Representatives. Responsible for making laws.
2. Executive Branch: Headed by the President, responsible for enforcing laws and conducting foreign policy.
3. Judicial Branch: Comprised of the Supreme Court and lower courts, responsible for interpreting laws and ensuring they align with the Constitution.

Political Parties and Elections

Political Parties

Political parties play a critical role in American politics, organizing elections, mobilizing voters, and shaping policy agendas. The two dominant parties are:

- Democratic Party: Generally advocates for social equality, environmental protection, and government intervention in the economy.
- Republican Party: Typically emphasizes free-market policies, limited government, and individual liberties.

Elections and Voting

Elections are fundamental to American democracy and occur at various levels, from local to federal. Key aspects include:

- Types of Elections:
 - Primary Elections: Determine the candidates for each political party.

 - Voter registration requirements vary by state.
 - Methods of voting include in-person, absentee, and mail-in ballots.
