Finding the Right Spot

- Observe the Shadows: Different fish create different shadow sizes in the water. Pay attention to the size of the shadow to determine which fish you may catch.
- Location Matters: Certain fish are only found in specific locations (river, sea, or pond), so make sure you're fishing in the right place for the species you're targeting.

Using Bait

- Fish Bait: Crafting and using fish bait can significantly improve your chances of attracting fish. To create bait, you'll need to collect manila clams found on the beach, which you can dig up with a shovel. Use the bait by tossing it into the water where you want to fish.
