Bikram Yoga, often referred to as hot yoga, is a system developed by Bikram Choudhury in the 1970s. It consists of a series of 26 postures and two breathing exercises practiced in a heated room, typically around 105°F (40°C) with 40% humidity. This specific environment is designed to promote flexibility, detoxification, and cardiovascular health. The class is structured to ensure that practitioners receive a comprehensive workout that targets all muscle groups.

## **Benefits of Practicing Bikram Yoga**

1. Improved Flexibility: The heat helps to warm up the muscles, allowing for deeper stretches and improved range of motion.
2. Detoxification: Sweating during the practice helps to flush out toxins from the body, promoting overall health.
