Installation Process

Installing your Bistee wireless door chime is a simple process that can often be completed in under an hour. Below are the steps to guide you through the installation.

What You Will Need

- Bistee wireless door chime kit (includes the chime unit and push button)
- Screwdriver (if mounting the push button)
- Batteries (if not included in the kit)
- Drill (optional, depending on the surface for mounting)

Step-by-Step Installation Guide

1. Choose the Location:

- Select a location for both the chime unit and the push button.
- The push button should be installed outside near your door, while the chime unit should be placed in a central location inside your home.

2. Install the Push Button:

- If the push button requires mounting, use the screws provided in the kit to attach it to the wall or door frame.
- Make sure it is at a comfortable height for visitors to reach.

3. Insert Batteries:

- Open the battery compartment of the push button and insert the required batteries, ensuring the polarity (+ or -) is correct.
- Repeat this process for the chime unit.

4. Pair the Devices:

- Follow the instructions provided in the manual to pair the push button with the chime unit.
- Typically, this involves pressing a button on the chime unit to enter pairing mode and then pressing the push button.

5. Test the System:

- After pairing, press the push button to test whether the chime unit rings.
- Adjust the volume or tone settings if necessary.
