- A) Berlin
- B) Madrid
- C) Paris
- D) Rome

Answer: C) Paris

2. True/False Questions

These questions require participants to determine if a statement is true or false. They are often quick to answer and can lead to interesting discussions. For example:

Question: The Great Wall of China is visible from the moon.
Answer: False

3. Open-Ended Questions

Open-ended questions allow for more elaborate responses and promote critical thinking. For instance:

Question: Explain the process of photosynthesis.
Answer: Photosynthesis is the process by which green plants, algae, and some bacteria convert light energy into chemical energy, using carbon dioxide and water to produce glucose and oxygen, with the help of sunlight and chlorophyll.
