Background of Catch-22

Origins and Publication

"Catch-22" was written during a period marked by the Cold War and the Vietnam War, reflecting the disillusionment of the American public. The novel follows Captain John Yossarian, a U.S. Army Air Forces B-25 bombardier, as he attempts to maintain his sanity amidst the chaos of World War II. The narrative structure employs a non-linear approach, often looping back on itself, which enhances the sense of confusion and absurdity that characterizes Yossarian's experiences.

When it was first published, "Catch-22" received mixed reviews. Some critics celebrated its innovative style and dark humor, while others found its structure disorienting. However, the book gradually gained a cult following and went on to become a classic of modern American literature.

The Concept of Catch-22

At the heart of the novel is the concept of "Catch-22," a bureaucratic rule that highlights the paradoxes of war and the challenges faced by those caught in the machinery of military bureaucracy. The rule states that airmen can be declared insane and unfit for duty if they willingly continue to fly dangerous missions. However, if they apply for a discharge based on their insanity, they are deemed sane and thus ineligible for relief. This catch exemplifies the absurdity and illogical nature of the systems in place, which often prioritize bureaucratic efficiency over human life.
