Materials Needed:

- Black yarn (for the carbon atom)
- Red yarn (for the oxygen atom)
- White yarn (for the hydrogen atoms)
- Crochet hook (size G/4.0 mm)
- Keychain loop
- Scissors
- Yarn needle

Pattern Instructions:

1. Create the Carbon Atom:

- Using black yarn, make a magic ring.
- Round 1: 6 single crochets (sc) into the ring (6).
- Round 2: Increase in each stitch (12).

2. Create the Oxygen Atom:

- Using red yarn, make a magic ring.
- Round 1: 6 sc into the ring (6).
- Round 2: Increase in each stitch (12).

3. Create the Hydrogen Atoms:

- Using white yarn, make two magic rings.
- Round 1: 6 sc into each ring (6).
- Round 2: Increase in each stitch (12).

4. Assembly:

- Attach the carbon atom to the keychain loop.
- Use the yarn needle to sew the oxygen and hydrogen atoms onto the carbon atom, following the molecular structure of H_2O or CO_2 .

5. Finishing:

- Weave in any loose ends and trim the excess yarn.

2. DNA Double Helix Scarf

A more advanced project, this DNA-inspired scarf can be a fashionable addition to your wardrobe and a conversation starter.
