# chrome how to clear history on exit

**Chrome how to clear history on exit** is a common concern for users who prioritize privacy and want to maintain a clean browsing experience. Google Chrome, one of the most widely used web browsers, provides various features to manage your browsing history. Whether you're using a public computer, sharing your device, or just want to keep your online activities private, knowing how to clear your history upon exiting the browser can be incredibly useful. This article will guide you through the steps to automatically clear your browsing history when you close Chrome and explore additional options for managing your browsing data.

## Understanding Chrome's Browsing History

When you use Google Chrome, the browser keeps a record of all the websites you visit, which can be helpful for quickly accessing previously viewed pages. However, this information can also pose a privacy risk, especially if someone else uses your device. Here's what you need to know about Chrome's browsing history:

- **Accessing History:** You can view your browsing history by pressing Ctrl + H (Windows) or Command + Y (Mac).

- **Data Stored:** Chrome saves URLs, the time of visits, cookies, cache, and more.

- **Privacy Concerns:** Saved history may expose your online activities to others or online trackers.

## How to Clear History on Exit in Chrome

To automatically clear your browsing history when you exit Google Chrome, you need to adjust some settings or use specific extensions. Here's a step-by-step guide on how to do this:

## Method 1: Using Chrome's Built-in Settings

While Google Chrome does not provide a direct option to clear history on exit, you can use the following workaround:

1. Open Chrome Settings:

- Click on the three vertical dots (menu) in the upper-right corner of the browser.
- Select "Settings" from the drop-down menu.

2. Manage Privacy and Security:
- On the left sidebar, click on "Privacy and security."
- Choose "Clear browsing data."

3. Configure Clearing Data:
- In the Clear browsing data window, choose the time range you want to clear. Select "All time" to remove everything.
- Check the boxes for "Browsing history," "Download history," "Cookies and other site data," and "Cached images and files."
- Click on "Clear data."

4. Set a Reminder:
- Since Chrome does not clear history automatically upon exit, you might want to set a reminder to perform this action manually.

## Method 2: Using Chrome Extensions

If you want a more automated solution to clear your browsing history on exit, consider using a Chrome extension. Here's how to do it:

1. Visit the Chrome Web Store:
- Go to the [Chrome Web Store](https://chrome.google.com/webstore).

2. Search for "History Cleaner":
- Use the search bar to look for extensions like "Auto Clear Cookies," "History Cleaner," or "Clear Browsing Data."

3. Install the Extension:
- Click on the extension you prefer and then click "Add to Chrome."
- Follow the on-screen instructions to install the extension.

4. Configure the Extension:
- Once installed, navigate to the extension settings.
- Look for options that allow you to clear history upon exiting Chrome.
- Adjust the settings according to your preferences.

## Additional Tips for Managing Browsing Data

In addition to clearing history on exit, consider these tips to enhance your privacy and manage your browsing data effectively:

## Use Incognito Mode

Incognito Mode allows you to browse without saving any history, cookies, or site data. Here's how to use it:

- Open Chrome and click on the three vertical dots in the upper-right corner.
- Select "New Incognito Window" or press Ctrl + Shift + N (Windows) or Command + Shift + N (Mac).
- Browse as usual; once you close the incognito window, all data will be discarded.

## Regularly Review and Delete History

Make it a habit to regularly review your browsing history and delete items you no longer need. To do this:

1. Open your history by pressing Ctrl + H (Windows) or Command + Y (Mac).
2. Browse through the list and select individual items for deletion.
3. You can also click on "Clear browsing data" to remove everything at once.

## Clear Cookies and Cache

Clearing cookies and cache can also help protect your privacy. Here's how to do this:

1. Go to Chrome Settings and navigate to "Privacy and security."
2. Select "Clear browsing data."
3. Choose the time range and check the boxes for "Cookies and other site data" and "Cached images and files."
4. Click "Clear data."

# Conclusion

In summary, knowing **Chrome how to clear history on exit** is essential for maintaining your privacy and a clutter-free browsing experience. While Chrome does not offer a built-in feature to automatically clear history on exit, using extensions or incognito mode can help you achieve similar results. Regularly reviewing and managing your browsing data will further enhance your online security. By staying proactive about your digital footprint, you can ensure a safer and more private browsing experience.

# Frequently Asked Questions

## How do I set Chrome to clear history on exit?

Currently, Chrome does not have a built-in option to automatically clear history on exit. You can use extensions like 'Auto History Wipe' to achieve this functionality.

## Can I clear Chrome history manually before closing the browser?

Yes, you can manually clear your history by clicking on the three-dot menu > 'History' > 'History' again, and then selecting 'Clear browsing data'. Choose the time range and data types to delete.

## What data can I choose to clear when I clear history in Chrome?

When clearing history in Chrome, you can choose to delete browsing history, download history, cookies and other site data, cached images and files, and more.

## Will clearing my history on exit affect my saved passwords?

No, clearing your browsing history does not affect saved passwords. Passwords are stored separately in Chrome's password manager.

## Is there a keyboard shortcut to clear browsing data in Chrome?

Yes, you can use the keyboard shortcut Ctrl + Shift + Delete (or Command + Shift + Delete on Mac) to quickly open the 'Clear browsing data' dialog.

## Can I clear history on exit in Chrome for specific sites only?

No, Chrome does not allow for selective clearing of history on exit. You can only clear all history or specific entries manually before exiting.

## Are there any privacy-focused alternatives to Chrome that clear history on exit?

Yes, browsers like Firefox and Brave offer options to clear history on exit as part of their privacy settings.

# What happens to my bookmarks if I clear my history in Chrome?

Clearing your history does not affect your bookmarks. They are stored separately and will remain intact.
