The STAR Technique

One effective method for answering competency-based interview questions is the STAR technique, which stands for:

1. **Situation:** Describe the context within which you performed a task or faced a challenge.
2. **Task:** Explain the specific task or challenge you were responsible for.
3. **Action:** Detail the actions you took to address the task or challenge.
4. **Result:** Share the outcomes of your actions, including what you learned or achieved.

Utilizing the STAR technique helps structure your answers logically and clearly, making it easier for interviewers to follow your thought process.
