When to Use Commas in Dates

The rules for using commas in dates can be straightforward, but they also have specific applications. Here are the primary scenarios where commas are necessary:

1. **In a Full Date:** When writing a complete date that includes the day, month, and year, a comma is required after the day and after the year if the date is part of a larger sentence.
- Example: "On July 4, 1776, the Declaration of Independence was adopted."
2. **In a Month and Year Format:** When the month and year are written without the day, there is no need for a comma.
- Example: "The event is scheduled for July 2023."
3. **When Writing Only the Day and Month:** If the sentence includes only the day and month, no comma is needed.
- Example: "We celebrate Thanksgiving on November 25."
4. **In Lists:** When dates are used in lists or bullet points, commas are typically required to separate the elements.
