Understanding Compound Words

What Are Compound Words?

Compound words are formed when two or more individual words are combined to create a new word with a specific meaning. For example, the words "tooth" and "brush" come together to form the compound word "toothbrush." Compound words can be classified into three categories:

1. Closed Compound Words: These are written as a single word (e.g., "notebook," "sunflower").
2. Hyphenated Compound Words: These contain a hyphen between them (e.g., "mother-in-law," "check-in").
3. Open Compound Words: These are written as separate words but are used together to convey a single idea (e.g., "ice cream," "post office").
