2. Organize Pieces by Color and Pattern

Group pieces based on color, pattern, or shape. This organization makes it easier to find the right pieces when you start assembling the puzzle.

3. Use the Picture as a Reference

Always refer to the picture on the box or packaging. It serves as a guide that can help you identify where specific pieces might fit.

4. Break the Puzzle into Sections

Divide the puzzle into manageable sections. Work on small areas instead of attempting to complete the entire puzzle at once. This approach reduces feelings of being overwhelmed.

5. Take Breaks

If you find yourself stuck, take a break. Stepping away from the puzzle can help clear your mind and provide a fresh perspective when you return.

6. Practice Patience and Persistence
