Understanding Corporate Treasury

2. **Funding Management:** Overseeing the company's debt and equity financing strategies, including issuing bonds, securing loans, and managing relationships with banks and investors.
3. **Risk Management:** Identifying and mitigating financial risks, including interest rate fluctuations, foreign exchange risks, and credit risks associated with counterparties.
4. **Cash Flow Forecasting:** Analyzing historical cash flow data to predict future cash needs and identify potential shortfalls or surpluses.
5. **Investment Management:** Managing the company's excess cash by investing in short-term instruments that align with the organization's risk appetite and liquidity needs.
